

Start of the First Dutch Silverlight & Expression user group

The first Dutch Silverlight & Expression user group is starting its activities from November 2 2010. Starting this date the user group named "Silverlight & Expression Insiders" will attempt to bring together (interaction) designers and (front-end) developers that are excited about Silverlight & Expression tools.

The activities of the user group will be to organize events, speaking at events, publishing articles and keeping people up-to-date using the website (<http://sixin.nl>) and an newsletter.

"We are really looking forward to it. We think that, besides the existing user groups, we can fill up the gap that came with this new technology and products" said Rob Houweling, chairman of Silverlight & Expression Insiders.

Silverlight & Expression Insiders is founded by a number of enthusiastic professionals:

Antoni Dol, senior designer at [Macaw](#)

Eric van den Hoek (secretary/treasurer), entrepreneur at NVT Cornersoft

Rob Houweling (chairman), technical coordinator at [Amercom](#) and Expression MVP

Timmy Kokke, software engineer at [Valk Software](#)

Mark Monster (vice chairman), software engineer at [Rubicon](#)

Koen Zwijkstra, entrepreneur at [First Floor Software](#)
